Subject: DOCKET NO. SDWA-10-2013-0080 / Groundwater Monitoring Well Installation Activities - Tuesday, July 9, 2013 Update

Rene,

The following tasks were completed Tuesday, July 9, 2013. Cascade drilled YVD-16 to a total depth of 121 feet bgs. Generally, the lithology consisted of sand and gravel to 35 feet, Clay to 65 feet, silt to 106 feet, and sandy gravel/gravelly sand to 121 feet. Water was encountered around 106 feet. Cascade tripped out the drill rods and secured the boring for the night. The water level in the drill casing will be allowed to stabilize overnight and the static water level will be gauged in Wednesday morning. Monitoring well installation activities will continue Wednesday.

Also, anticipate Cascade will mobilize onto YVD-12 located near the intersection of Beam and Kirks Roads on Thursday.

Let me know if you have any questions.

Best regards

Tom
